Project Design Phase-II Technology Stack (Architecture & Stack)

Date	17 October 2022	
Team ID	PNT2022TMID16626	
Project Name	Exploratory Analysis Of Rainfall Data in India For	
	Agriculture	
Maximum Marks	4 Marks	

Type your text

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table 1 & table 2

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	Backend Framework, Relational Database, CSS Styling framework	PyJWT, IBM Cloud DB, Flask
2.	Security Implementations	Request authentication using JWT Tokens	HS-256, SSL Certs, Encryptions
3.	Scalable Architecture	It Supports Multiple Sample prediction using Excel File	Pandas, Numpy
4.	Availability	Availability is increased by Distributed Servers in Cloud VPS	IBM Cloud Hosting
5.	Performance	The application is expected to handle multiple predictions per second	Load Balancers, Distributed Servers

Table-1 : Components & Technologies:

S.No	Component	Description	Technology
1.	Website	User interacts with the prediction model through the website to predict the rainfall data	HTML, CSS, JavaScript
2.	Cloud Database	The model provided with the data from IBM cloud database	ibm_db(python package), IBM Cloud DB
3.	API	Used to extend the service to other applications	Flask Application
4.	JWT & Sessions	It is used for Handling JSON web tokens (signing, verifying, decoding)	PyJWT, Flask-Sessions
5.	Machine Learning Model	It is developed to predict the rainfall using ML algorithms.	Sklearn, Algorithms - DT & MLR
6.	Data processing	Data is pre-processed and then used for prediction.	Pandas, Matplotlib, Numpy
7.	File Storage	File storage requirements	IBM Block Storage or Other Storage Service or Local Filesystem

Table-2: Application Characteristics:
